I am a US citizen who had lived abroad since the age of 14. I have been comiiant with the US tax reporting system since I got my first job. The implementation of FBAR reporting demands has added a significant financial burden, as I need to pay an accountant to do this, in addition to the onerous accounting fees I pay for filing on the US and my country of residency.

This added layer off reporting demands on us citizens abroad had become a nightmare!!!  
It needs to end
