I think it is ridiculous that such a question would be asked in the first place... Whose business is it what my preference is. I think all of this has been pushed too far. This is an invasion of privacy. From this point on I will not answer such questions on any paperwork, as well as my race. I am American and I will write such on my papers from now on.

I truly believe that the government is just trying to make new jobs with this kind of garbage. You say you now need more people to do these jobs which is not true. If you quit thinking up new garbage to report on you wouldn't need more people to do the work. Just take the darn census and get on with it. And stop counting population that are not citizens of American. My grandparents who immigrated from Germany worked hard to become citizens, stop making it easy for these cheaters.
