Having SOGI on the ACS is a huge boon to research. Not only that it allows people to self identify as they wish to. We have had so little information about the LGBTQ community so this will help illuminate how LGBTQ folks live in America. It will also provide the ability to look at the intersectionality of SOGI, race, and ethnicity. We will be able to explore outcomes for these groups and better address their needs. I am very excited to see this being collected and the potential for research about queer life in America.
