Words like Male, Female and Intersex refer to biological sexes that are assigned at birth.

Words like Man, Woman, Transgender and Nonbinary refer to genders.

PLEASE DO NOT use biological sex words like male and female when asking about gender. Gender and biological sex are not synonymous and bigotry towards trans people/gender diverse people is propagated when these concepts are conflated.

Also, intersex people exist. Biological sex is not binary. You need to have a third option of intersex under the question "what biological sex were you assigned at birth?" since there are people who have that as their sex assignment at birth.
