Please rethink the timing of this required reporting. We do not have final guidelines, yet (as of June 6th) with the exception of a few batch processing volumes. There were open comments for the proposed fields to be collected until April, so we do not even know what is truly required yet. The report is due on October 1st, which is the busiest time of year for offices that will be required to compile the data. The estimated time the Dept. of Edu calculated is way off.; this is a SIGNIFICANT burden for necessary offices running lean with minimal staff. I get the importance of this information, but trying to put the cart before the horse is unacceptable. Thank you.
