On behalf of colleagues at my university, I respectfully request that the Financial Value Transparency and Gainful Employment Reporting Requirements be delayed until July, 2025. With the significant burden of delayed FAFSA processing and the errors that still exist with FAFSA submittals, we are using all of our time helping students and do not see the basic financial aid process easing up at all. Once disbursements are clear to be processed in the fall, we begin the process of working with the 2025-26 FAFSA's and a new entering class along with other standard reporting. With only partial guidance provided on the new FVT/GE reporting, it will be a burden our small office will struggle to handle. It has been an extremely difficult year and we need all the preparation we can to support this new initiative.
