

PAPERWORK REDUCTION ACT CHANGE WORKSHEET

Program for International Student Assessment 2025 (PISA 2025) Main Study Change Request

Agency/Subagency U.S. Department of Education, Institute of Education Sciences		OMB Control Number 1850-0755 v.30	
		Current Record	New Record
Agency form number(s)	NA	NA	
Annual reporting and record keeping hour burden			
Number of respondent	41,320	41,320	
Total annual responses	59,087	59,087	
Percent of these responses collected electronically	64%	64%	
Total annual hours	19,041	19,041	
Difference		NA	
Explanation of difference		NA	
Program change		NA	
Adjustment			
Annual reporting and record keeping cost burden (in thousands of dollars)			
Total annualized capital/startup costs	NA	NA	
Total annual costs (O&M)	NA	NA	
Total annualized cost requested	NA	NA	
Difference		NA	
Explanation of difference			
Program change		NA	
Adjustment		NA	
Other change**			
<p>PISA is an international assessment of 15-year-olds, which focuses on assessing students' reading, mathematics, and science literacy. That is, PISA assesses functional skills that students have acquired as they near the end of mandatory schooling (aged 15 years), and students' knowledge and skills gained both in and out of school environments. It is sponsored by the Organization for Economic Cooperation and Development (OECD) and is conducted in the US by the National Center for Education Statistics (NCES) of the U.S. Department of Education. The United States has participated in PISA since it was first administered in 2000 and we plan to participate in 2025. This allows us to track trends over time and to compare the performance of U.S. students with that of students in other education systems. In each administration of PISA, one of the subject areas (reading, mathematics, or science literacy) is the major domain and has the broadest content coverage, while the other two subjects are the minor domains. In 2025, science literacy will be the major domain, reading and mathematics literacy will be the minor domains and an additional assessment of self-regulated learning called Learning in a Digital World will also be included. In addition to the cognitive assessments, PISA includes questionnaires administered to school principals and assessed students. To prepare for the 2025 main study, PISA countries will conduct a field test in 2024. The primary purpose of the field test is to evaluate newly developed assessment and questionnaire items but it also serves to test the assessment operations.</p> <p>The request to conduct PISA 2025 main study recruitment and field test was approved in September 2023 (OMB# 1850-0755 v.28), with a change request (OMB# 1850-0755 v.29) approved in February 2024. This submission makes four classes of changes: (1) changes the administration window of PISA 2025 from Fall 2025 to Spring 2025, and updates all materials to reflect that change; (2) changes the domain name for the PISA 2025 Main Study website; (3) reverts the payment method for PISA 2025 Main Study to the previously used personal check, as the checkcard used in the Field Test was not as effective as hoped; and (4) small changes to modernize communication materials.</p> <p>The final materials for the PISA 2025 Main Study, including the final questionnaires, will be submitted for 30D of public comment and final OMB review in Fall 2024.</p>
