PART I.—GENERAL INFORMATION

Background.-- This proceeding was instituted in response to petitions filed on September 28, 2023, by Eastman Kodak Company, Rochester, New York. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Questionnaires and other information pertinent to this proceeding are available at https://usitc.gov/reports/active_import_injury_questionnaires and <https://ids.usitc.gov/case/8144/investigation/8498>.

ALPs covered by this proceeding are aluminum lithographic printing plates. Aluminum lithographic printing plates consist of a flat substrate containing at least 90 percent aluminum by weight. The aluminum-containing substrate is generally treated using a mechanical, electrochemical, or chemical graining process, which is followed by one or more anodizing treatments that form a hydrophilic layer on the aluminum-containing substrate. An image-recording, oleophilic layer that is sensitive to light, including but not limited to ultra-violet, visible, or infrared, is dispersed in a polymeric binder material that is applied on top of the hydrophilic layer, generally on one side of the aluminum lithographic printing plate. The oleophilic light-sensitive layer is capable of capturing an image that is transferred onto the plate by either light or heat. The image applied to an aluminum lithographic printing plate facilitates the production of newspapers, magazines, books, yearbooks, coupons, packaging, and other printed materials through an offset printing process, where an aluminum lithographic printing plate facilitates the transfer of an image onto the printed media.

Aluminum lithographic printing plates within the scope of these investigations include all aluminum lithographic printing plates, irrespective of the dimensions or thickness of the underlying aluminum substrate, whether the plate requires processing after an image is applied to the plate, whether the plate is ready to be mounted to a press and used in printing operations immediately after an image is applied to the plate, or whether the plate has been exposed to light or heat to create an image on the plate or remains unexposed and is free of any image.

Subject merchandise also includes aluminum lithographic printing plates produced from an aluminum sheet coil that has been coated with a light-sensitive image-recording layer in a subject country and that is subsequently unwound and cut to the final dimensions to produce a finished plate in a third country (including the United States), or exposed to light or heat to create an image on the plate in a third country (including in a foreign trade zone within the United States).

Excluded from the scope of this investigation are lithographic printing plates manufactured using a substrate produced from a material other than aluminum, such as rubber or plastics.

ALPs are currently imported under statistical reporting number 3701.30.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). They may also be imported under HTSUS statistical reporting numbers 3701.99.3000, 3701.99.6060, and 8442.50.1000. The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

Importer.--Any person or firm engaged, either directly or through a parent company or subsidiary, in importing ALPs (as defined above) into the United States from a foreign manufacturer or through its selling agent.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

Valid number error messages.--If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue is provided at the end of this questionnaire and is available upon request from Celia Feldpausch (202-205-2387, celia.feldpausch@usitc.gov).

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is *optional*. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

Correcting valid number error messages.--If you are completing this questionnaire in a country that uses periods (".") to delineate multiples of 1000 (i.e., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in the numeric form fields. This issue stems from your computer's number formatting setting (i.e., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (",") delineate multiples of 1000 and periods (".") delineate fractions less than one. Many EU and other countries use the reverse where multiples of 1000 are delineated with periods (".") and fractions less than one are delineated with commas (","). The U.S. International Trade Commission's questionnaires are set-up in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU or other country number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g., "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC importer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to Italy (or your country) settings.
