I am an academic librarian who opposes the plan to eliminate the Academic Libraries survey. The unique longitudinal data of the Academic Libraries survey provides crucial information about changes and trends in college and university libraries. This invaluable information helps academic libraries, which are more important now than ever due to the lack of funding for K-12 school libraries, many of which do not have a librarian (some have even been shut down), as well as the importance of information literacy in this age of the internet and AI. The data from the Academic Libraries survey are widely used by academic libraries and are so important for us. Please do not eliminate the Academic Libraries survey. Thank you.
