I oppose the plan to eliminate the Academic Libraries survey. I have worked in libraries for the last 10 years and 9 of them have been spent in Academic Libraries across the country. The data that the Academic Libraries survey provides crucial information about changes and trends in college and university libraries that help us serve our student population better, recognizing trends and challenges that the modern student faces. If we want our students to succeed not just in college but in life we need to make sure that we are doing everything in our power to support them and that is what academic libraries do. We are more than places with books and journals, we are the heart of campuses across this country.
