I am writing in opposition to the proposal to stop collecting data from college & university libraries. As a retired librarian from the Maricopa Community College District in Arizona, I know how valuable this data is for librarians when assessing the success of their campus library in achieving its student success goals. In addition, the data is invaluable when it comes to planning future steps the library and college can take to continue providing the most effective support for their student body. I ask that you continue collecting this very useful data which synthesizes crucial information about changes and trends in college and university libraries. Thank you for your consideration.
