To anyone who can read at the Office Information and Regulatory Affairs, I submit the following: What work does your office perform? What does the word integrated mean to you?

I am from the era of the Dewy Decimal System; I was born in 1945, and without a classification system that relates data for any information, no factual research is possible. Computers can help but that date can be grossly manipulated quite quickly. Does anyone there realize what the loss of this service would do?

It sounds to me like another Federal attempt at privatizing their responsibilities for personal gain. This thought is moronic and inconceivable in thought. Third (3rd) party affiliations or reduction of this vital service should be criminal .
Unbelievable, R. Joseph Hatin
