PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to petitions filed on June 20, 2024, by the American Personal Transportation Vehicle Manufacturers Coalition (“APTVMC”), a coalition whose members include Club Car, LLC (“Club Car”), Evans, Georgia, and Textron Specialized Vehicles, Inc. (“TSV”), Augusta, Georgia. Countervailing and antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce (“Commerce”) makes an affirmative determination of subsidization and dumping. Pertinent information to this proceeding is available at:

Questionnaires: https://usitc.gov/reports/active_import_injury_questionnaires.

Other case information: <https://ids.usitc.gov/case/8209/investigation/8588>.

LSPTVs covered by this proceeding consist of certain low speed personal transportation vehicles and subassemblies thereof, whether finished or unfinished and whether assembled or unassembled, with or without tires, wheels, seats, steering columns and steering wheels, canopies, roofs, or batteries. LSPTVs meeting this description are generally open air vehicles with a minimum of four wheels, a steering wheel, a traditional side-by-side or in-line row seating arrangement (i.e., non-straddle), foot operated accelerator and brake pedals, and a gross vehicle weight of no greater than 5,500 pounds. The main power source for subject LSPTVs is either an electric motor and battery (including but not limited to lithium-ion batteries, lithium phosphate batteries, lead acid batteries, and absorbed glass mat batteries) or a gas-powered internal combustion engine. Subject LSPTVs may be described as golf carts, golf cars, low speed vehicles, personal transportation vehicles, or light utility vehicles.

LSPTVs subject to these investigations typically have a maximum top nameplate speed of no greater than 25 miles per hour as required by federal, state, and local laws and regulations. Subject LSPTVs with a maximum top nameplate speed greater than 20 miles per hour normally must comply with the U.S. Department of Transportation’s Federal Motor Vehicle Safety Standards for Low-Speed Vehicles set forth in 49 C.F.R. § 571.500. LSPTVs that otherwise meet the physical description of this scope but are not certified under 49 C.F.R. § 571.500 and are not certified under other sections of subpart B of the Federal Motor Vehicle Safety Standards (49 C.F.R. § 571), are not excluded from these investigations. LSPTVs that are certified under both 49 C.F.R. § 571.500 and other sections of subpart B of the Federal Motor Vehicle Safety Standards remain subject to the scope of these investigations. Subject LSPTVs that have a maximum top nameplate speed of less than 25 miles per hour may be certified to the SAE International (SAE) standards SAE J2258 and SAE J2358. LSPTVs that have a maximum top nameplate speed of less than 20 miles per hour may also be certified to the Outdoor Power Equipment Institute (OPEI) standards OPEI Z130.1 and OPEI Z135.

An unfinished and/or unassembled LSPTV subject to these investigations covers at a minimum a subassembly, also known as a “rolling chassis,” which is typically comprised of, but not limited to, a frame or body with front and/or rear suspension components (such as arms, springs, axles, spindles, and shafts) installed and powertrain components (including either an electric motor or a gas-powered internal combustion engine) installed or ready for installation.

When imported together with a “rolling chassis” subject to these investigations, other LSPTV components, such as batteries, bumpers, wheel and tire assemblies, cowlings, fenders, grills, kick plates, steering column and steering wheel assemblies, dash assemblies, seat assemblies, pedal assemblies, brake assemblies, canopy or roof assemblies, temporary rain enclosures, windshields, mirrors, headlights, taillights, lighting systems, or storage—whether assembled or unassembled, whether as part of a kit or not, and whether or not accompanied by additional components—constitute part of an

unfinished and/or unassembled LSPTV that is subject to these investigations. The inclusion of other products, components, or assemblies not described here does not remove the product from the scope.

Subject LSPTVs and subassemblies are covered by the scope of these investigations whether or not they are accompanied by other parts. These investigations cover all LSPTVs and subassemblies meeting the physical description of the scope, regardless of overall length, width, height, or weight. Individual components that do not comprise a subject LSPTV or subassembly that are entered and sold by themselves are not subject to the investigations, but components entered with an LSPTV or subassembly, whether finished or unfinished and whether assembled or unassembled, are subject merchandise.

LSPTVs and subassemblies subject to these investigations include those that are produced in China whether assembled with other components in China or in a third country. Processing or completion of finished and unfinished LSPTVs and subassemblies either in China or in a third country does not remove the product from the scope.

Specifically excluded from the scope of these investigations are all-terrain vehicles (which typically have straddle seating and are steered by handlebars), multipurpose off-highway utility vehicles (which typically have a maximum top nameplate speed of greater than 25 miles per hour), and recreational off-highway vehicles (which typically have a maximum top nameplate speed of greater than 30 miles per hour). Also excluded from the scope are go-karts, electric scooters, golf trolleys, and mobility aids (which include power wheelchairs and scooters and which are used for the express purpose of enabling mobility for a person).

The LSPTVs subject to the investigations are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at statistical reporting number 8703.10.5030. LSPTVs subject to the investigations may also enter under HTSUS statistical reporting number 8703.90.0100. The LSPTV subassemblies that are subject to the investigations typically imported under HTSUS statistical reporting numbers 8706.00.1540 and 8707.10.0040. The HTSUS subheadings are provided for convenience and customs purposes only, and the written description of the merchandise subject to the investigations is dispositive.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals. In addition, if your firm is a U.S. producer, the information you provide on your production and imports of LSPTVs and your responses to the questions in part I of the producer questionnaire will be provided to the U.S. Department of Commerce, upon its request, for use in connection with (and only in connection with) its requirement pursuant to section 702(c)(4)/732(c)(4) of the Act (19 U.S.C. § 1671a(c)(4)/1673a(c)(4)) to make a determination concerning the extent of industry support for the petition requesting this proceeding. Any information provided to Commerce will be transmitted under the confidentiality and release guidelines set forth above. Your response to these questions constitutes your consent that such information be provided to Commerce under the conditions described above.

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDS tool." Use of this tool to help your firm complete this questionnaire is *optional*. Firms opting to use the D-GRIDS tool to populate their data into this questionnaire will need the D-GRIDS specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDS tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDS tool are available within the D-GRIDS tool itself.

- I-1a. **Reporting requirements.**--Please report below the actual number of hours required and the cost to your firm of completing this questionnaire for use by the Office of Management and Budget.

Hours	Dollars

Public reporting burden for this questionnaire is estimated to average 55 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please provide such comments to the Office of Investigations, import_injury@usitc.gov.

- I-1b. **TAA information release.**--In the event that the U.S. International Trade Commission (USITC) makes an affirmative final determination in this proceeding, do you consent to the USITC's release of your contact information (company name, address, contact person, contact person's title, telephone number, email address) appearing on the front page of this questionnaire to the Departments of Commerce, Labor, and Agriculture, as applicable, so that your firm and its workers can be made eligible for benefits under the Trade Adjustment Assistance program?

☐ No

I-2a. **Type of operations.**--Please identify which type of operations your firm conducts below.

Type of operations	Description <i>(check all that apply)</i>	
Production	Your firm purchases or otherwise procures upstream out-of-scope inputs (such as aluminum or steel, engines, wheels, etc.) for production and makes an LSPTVs.	<input type="checkbox"/>

In your response, please discuss the duration and timing of any such changes as they relate to your firm's operations.

No	Yes	If yes, describe these changes including the impact over time on the (a) supply chain, (b) production and shipments, and (c) employment with respect to LSPTVs.
<input type="checkbox"/>	<input type="checkbox"/>	

- II-3a. **Production using same machinery.**--Please report your firm's production of products using the same equipment, machinery, or employees as used to produce LSPTVs, and the combined capacity (both installed and practical capacity) on this shared equipment, machinery, or employees in the periods indicated.

"Installed overall capacity" – The level of production that your establishment(s) could have attained, assuming your firm's *optimal* product mix, and based solely on *existing capital investments*, i.e., machinery and equipment that is in place and ready to operate. This capacity measure does not take into account other constraints to production such as existing workforce constraints, availability of raw materials, or downtime for maintenance, repair, and clean-up. This capacity measure is sometimes referred to as "nameplate" or "theoretical" capacity.

"Practical overall capacity" – The level of production that your establishment(s) could reasonably have expected to attain, taking into account your firm's *actual* product mix over the period. This capacity measure is based on not only existing capital investments, i.e., machinery and equipment that is in place and ready to operate; but also non-capital investment constraints, such as (1) normal operating conditions, including normal downtime for maintenance, repair, and cleanup; (2) your firm's existing in place and readily available labor force; (3) availability of material inputs; and (4) any other constraints that may have limited your firm's ability to produce the reported products. Importantly, this capacity measure is the maximum "practical" production your firm could have achieved without hiring new personnel or expanding the number of shifts operated in the period.

"Practical LSPTVs capacity" – The level of production of LSPTVs that your establishment(s) could reasonably have expected to attain. The same assumptions apply to this capacity measure as for practical overall capacity, but only includes the portion of practical overall capacity allocated to the production of LSPTVs based on the actual product mix experienced over the period.

"Production" – All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

Takes into account	Installed overall capacity	Practical overall capacity	Practical LSPTVs capacity
Existing capital investments	Yes	Yes	Yes
Product mix	Yes	Yes	Yes
Normal downtime, maintenance, repair and clean-up	No	Yes	Yes
Existing labor force	No	Yes	Yes
Availability of material inputs	No	Yes	Yes
Actual number of shifts and hours operated	No	Yes	Yes

¹ Data reported for both "installed overall" and "practical overall" capacity should each individually be greater than data reported for total production (last line). Additionally, data reported for "installed overall" capacity should be greater than "practical overall" capacity in every period.

² Please provide details in your response to the question on capacity constraints in question II-3d below that explain the differences reported between "installed" overall capacity and "practical" overall capacity.

³ Data for this indicator will populate here once reported below in question II-8.

⁴ Data reported for practical LSPTVs capacity should be greater than the data reported for production of LSPTVs in each period, if not revise prior to submission to the Commission. Additionally, if your firm reports the production of no other products on the same machinery and using the same workers as LSPTVs then, "practical overall" and "practical LSPTVs" capacity measures should be equal to each other.

⁵ All-terrain vehicles ("ATVs") or medium to high speed personal transportation vehicles ("PTVs") are any motorized off-highway vehicles that might otherwise match the definition of LSPTVs but are designed and regulated to travel at speeds greater than 25 mph.

⁶ Please identify these products: _____.

- II-3b. **Operating parameters.**--The *practical* overall capacity reported in II-3a is based on the following operating parameters:

Hours per week	Weeks per year

- II-3c. **Capacity calculations.**--Please describe the methodology used to calculate *installed* and *practical* overall production capacities reported in II-3a, and explain any changes in reported capacities.

--

- II-3d. **Practical overall capacity constraints.**--Please describe the constraint(s) that set the limit(s) on your firm's practical overall capacity over the period reported in question II-3a. If different constraints were binding over different periods reported, please specify when each constraint was limiting your reported practical overall capacity. If a constraint was not actually binding over the period reported, but was still a constraint to achieving the installed capacity level, indicate at what level it would have been binding.

<input type="checkbox"/>	Other constraints (list the specific constraints in the description field)	

- II-3e. **Reaching installed overall capacity.**--Please describe and quantify the amount of time it would take and the additional actions that would be needed (e.g., hiring new workers, expanding shifts, procuring larger sources of raw material supply, etc.) for your firm to be able to fully utilize the reported installed overall capacity reported in II-3a.

--

- II-3f. **Excess installed overall capacity.**--To the extent that your company is reporting excess installed overall capacity, please report, with specificity: (1) which machines or equipment (or other elements of production) would need to be brought back into production for your plant to operate at full capacity, and (2) the specific dates on which such machines or equipment were last used by your plant to produce LSPTVs.

--

- II-4. **Product shifting.**—

- (a) Is your firm able to switch production (capacity) between LSPTVs and other products using the same equipment and/or labor?

No	Yes	If yes—(i.e., have produced other products or are able to produce other products) Please identify other actual or potential products.
<input type="checkbox"/>	<input type="checkbox"/>	

- (b) Please describe the factors that affect your firm's ability to shift capacity between products (e.g., time, cost, relative price change, etc.), and the degree to which these factors enhance or constrain such shifts.

--

- II-5. **Capacity checklist.**--Please check that the capacity numbers reported in question II-3a follow the Commission's relevant definitions for capacity.

Item	✓ if Yes
Are all three capacity measures reported based on <u>currently installed machinery and equipment</u> (i.e., the reported capacity level would not require additional capital investments in order to achieve)?	<input type="checkbox"/>
Are practical overall capacity and practical LSPTVs capacity measures reported based on <u>existing labor force</u> (i.e., the reported capacity level would not require hiring additional production related workers or adding shifts)?	<input type="checkbox"/>
Are practical overall capacity and practical LSPTVs capacity measures based on <u>the actual availability of material inputs</u> ?	<input type="checkbox"/>
Do both practical overall capacity and practical LSPTVs capacity measures account for <u>normal downtime, maintenance, repair and clean-up</u> activities?	<input type="checkbox"/>
Does the difference between practical overall capacity and practical LSPTVs capacity equal the portion of practical overall capacity that is dedicated to the production of out-of-scope products?	<input type="checkbox"/>

Note: If your firm is not able to answer "yes" to any of the above criteria as it relates to your firm's reported capacity levels, please revise your capacity numbers to be in conformance with the appropriate definition prior to submission to the Commission.

- II-6. **Tolling.**--Since January 1, 2021, has your firm been involved in a toll agreement regarding the production of LSPTVs?

"Toll agreement"-- Agreement between two firms whereby the first firm ("tollee") furnishes the raw materials and the second firm ("toller") uses the raw materials to produce a product that it then returns to the first firm with a charge for processing costs, overhead, etc.

No	Yes

II-7. Foreign trade zones.--

- (a) **Firm's FTZ operations**.--Does your firm produce LSPTVs in and/or admit LSPTVs into a foreign trade zone (FTZ)?

“Foreign trade zone” is a designated location in the United States where firms utilize special procedures that allow delayed or reduced customs duty payments on foreign merchandise. A foreign trade zone must be designated as such pursuant to the rules and procedures set forth in the Foreign-Trade Zones Act.

No	Yes	If yes--Describe the nature of your firm's operations in FTZs and identify the specific FTZ site(s).
<input type="checkbox"/>	<input type="checkbox"/>

- II-8. **Production, shipments, and inventory data.**--Report your firm's uses practical capacity, production, shipments, and inventories of domestically produced LSPTVs during the specified periods.

"Production" – All production in your U.S. establishment(s), including production consumed internally within your firm and production for another firm under a toll agreement.

"Commercial U.S. shipments" –Shipments made within the United States as a result of an arm's length commercial transaction in the ordinary course of business. Report net values (i.e., gross sales values less all discounts, allowances, rebates, prepaid freight, and the value of returned goods) in U.S. dollars, f.o.b. your point of shipment.

"Internal consumption (including shipments to your firm's own retail locations)" – Product consumed internally by your firm, which includes merchandise that your firm transferred to your firm's own retail locations (i.e., shipped to either a bricks-and-mortar store or to an online order fulfillment center). Such transactions are valued at fair market value (i.e., not the total value of final downstream processed merchandise (in the case of internal consumption), nor the retail sale value (in the case of your firm owning and operating its own retail locations); rather these transactions should be recorded at the fair market wholesale value of the merchandise used for further processing or for retail level sale).

"Transfers to related firms" –Shipments made to related firms. Such transactions are valued at fair market value.

"Related firm" –A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

RECONCILIATION OF SHIPMENTS, PRODUCTION, AND INVENTORY.--Generally, the data reported for the end-of-period inventories (i.e., line L) should be equal to the beginning-of-period inventories (i.e., line B), plus production (i.e., line C), less total shipments (i.e., lines D, F, H, and J). Please ensure that any differences are not due to data entry errors in completing this form, but rather reflect your firm's actual records; and also provide explanations for any differences (e.g., theft, loss, damage, record systems issues, etc.) if they exist.

- II-11. **Employment data.**--Report your firm's employment-related data related to the production of LSPTVs in your U.S. establishments and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to March periods, calculate similarly and divide by 3.

If your firm had the same number of PRWs in all calendar year and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3)."

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" --Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

II-13. **Purchases.**--Has your firm purchased LSPTVs produced in the United States or in other countries since January 1, 2021? (Do not include imports for which your firm was the importer of record. These should be reported in an importer questionnaire.)

"Purchase" – A transaction to buy product from a U.S. corporate entity such as another U.S. producer, a U.S. distributor, or a U.S. firm that has directly imported the product.

"Import" –A transaction to buy from a foreign supplier where your firm is the importer of record.

Internal consumption—Product consumed internally by your firm. Report internal consumption at fair market value even if this is not how these transactions are valued in your own books and records. This would commonly be estimated based on the company's commercial sales of similar product or market knowledge.

RECONCILIATION OF U.S. SHIPMENTS.--Please ensure that the quantities reported for U.S. shipments (i.e., lines Q through T) in each time period equal the quantity reported for U.S. shipments (i.e., lines F, H, J) in each time period in question VI-2. If the calculated fields below return values other than zero (i.e., "0"), the data reported must be revised prior to submission to the Commission.

- VI-5. **Employment data for processing activities.**--Report your firm's employment-related data related to the processing of LSPTVs in your U.S. establishments and provide an explanation for any trends in these data.

"Production and Related Workers" (PRWs) includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Average number employed may be computed by adding the number of employees, both full time and part time, for the 12 pay periods ending closest to the 15th of the month and divide that total by 12. For the January to March periods, calculate similarly and divide by 3.

If your firm had the same number of PRWs in all calendar year and had not experienced any changes in PRWs in the most recent interim period, you would have the same number of PRWs for the interim periods, regardless of whether the interim periods are Jan-Mar (Q1), Jan-June (Q1+Q2), or Jan-Sept (Q1+Q2+Q3).

"Hours worked" includes time paid for sick leave, holidays, and vacation time. Include overtime hours actually worked; do not convert overtime pay to its equivalent in straight time hours.

"Wages paid" – Total wages paid before deductions of any kind (e.g., withholding taxes, old-age and unemployment insurance, group insurance, union dues, bonds, etc.). Include wages paid directly by your firm for overtime, holidays, vacations, and sick leave.

- VI-6. **Operations on processing activities.**—Report the revenue and related cost information requested below on the processing of LSPTVs of your firm's U.S. establishment(s). Include only sales (whether domestic or exports) and costs related to your U.S. manufacturing operations.

DO NOT report any revenue or cost data related to the resale of purchased product.

Net sales—Report all commercial sales, internal consumption, and transfers to related firms, whether these are domestic sales or exports. Report net sales values less discounts, returns, allowances, and prepaid freight, in U.S. dollars, f.o.b. your point of shipment. The freight costs associated with delivering the product to your customer should not be included.

Note: If the financial data are reported on a calendar-year basis, the total net sales quantities and values should match the total shipment quantities and values reported in this section of the questionnaire (see question VI-10a for a reconciliation grid).

Internal consumption—Product consumed internally by your firm. Report internal consumption at fair market value even if this is not how these transactions are valued in your own books and records. This would commonly be estimated based on the company's commercial sales of similar product or market knowledge.

Transfers to related firms—Sales made to related firms. Report transfers to related firms at fair market value even if this is not how these transactions are valued in your own books and records. This would commonly be estimated based on the company's commercial sales of similar product or market knowledge.

Costs and expenses—Include costs and expenses associated with all reported net sales (i.e., for both domestic and export commercial sales, internal consumption, and transfers to related firms). If any freight costs were removed from net sales values, ensure the associated costs are removed from the applicable cost/expense line.

Inputs from related suppliers—Any inputs purchased from related suppliers should be reported in a manner consistent with your firm's accounting books and records.

Note: As requested in part I of this questionnaire, please keep all supporting documents/records used in the preparation of the financial data, as Commission staff may contact your firm regarding questions on the financial data. The Commission may also request that your company submit copies of the supporting documents/records (financial statements, including internal profit-and-loss statements for the division or product group that includes processing of LSPTVs, as well as specific statements and worksheets) used to compile these data.

If the calculated fields below return values other than zero (i.e., "0") this indicates the total net sales quantities and values do not match the total shipments quantities and values.
