I oppose the plan to eliminate the Academic Libraries survey.

I am an high school teacher and student do use the academic library for the college writing class.

I also attended college and made use of the academic library for my studies. For librarians they need the unique longitudinal data of the Academic Libraries survey because it provides crucial information about changes and trends in college and university libraries.

This can assist in creating budgets and choosing acquisitions relevant to current usage.

This information is vital to serving patrons/students/professors etc. with the most needed resources.

Please continue to fund the Academic Libraries Survey.

Thank you.
