I oppose this plan. I have an MLIS degree, and while I was earning my degree, I had a student job with one of my professors that dealt with obtaining information about school libraries. We made a presentation about the lack of qualified librarians in schools at a librarian convention. Making data like this less transparent would be a hindrance to researchers moving forward. Instead, this would be a step backward. Please do not let this go away.

Regards,

Joseph Panozzo, MLIS 2023
