I oppose the plan to eliminate the Academic Libraries survey. I have been working in an academic library within the the California State University system for the past 2 years and I plan to continue my career within the university/college library system for the rest of the my career. The data collected from the Academic Libraries survey provides crucial information about changes and trends in college and university libraries. This can directly affect funding and the future of academic/university libraries throughout this entire nation. Thank you for taking the time to read this.
