Libraries cannot prove their worth to those who fund them without gathering statistics. Please keep the Integrated Postsecondary Education Data System in place for this purpose and any other reason for which this level of Library needs statistics. It is not a waste of time to compile statistics and compose the statistical stories libraries need to be able to tell. Statistics also show libraries areas where they may be lacking or slipping. Please support Postsecondary Libraries in keeping statistical data for the betterment to serve the students and faculty. Thank you.
