General Comment

this is the propaganda book to keep the hunters in control of this nation, when most citizens are not hunters at all but wildlife watchers who love wildlife. this propaganda book has been in existence for at least the last 25 years and is paid for by general taxpayers, who pay for everything that the hunters get free. the hunters always glom onto general taxpayer funds for their murderous activities. this pal of usfws has been doing these books for a long time and clearly knows how to get the opinions only of wildlife murderers of various kinds so that they can build up their numbers. fact is majority of americans want nothing to do with wildlife killers and consider them a relic of another era in american life. hunters belong back in 1910, not at all in 2024 when our animals are dying from what mankind has done to them, ripped their habitat, poisoned their food and habitat with toxic chemicals and then sends out maniacs with guns to finish them all off. the whole thing is insane. absolutely insane. the usfws is part of that insanity but money always makes people behave in insane ways. it drives them crazy to get those high salaried jobs at usfws where they can lie to us virtually every single day. they don't protect a single animal. they are in the business of making money from wildlife extermination. it is insane. we have laws. those are disposed of by the corrupt insiders at the usfws. this comment is for the public record. i have observed this insanity for 25 years and we need change. animals deserve to live. not be cut down by insane men with guns.
