General Comment

As a responsible citizen a see this proposal as something that would save lives. Keeping track of this is important so this employees feel that they're being used in a proper matter and that people actually care about what they do. I don't see any problem on this proposal, I do really believe is on the best interest of the miners, especially when they're being taught even in emergency situations. Thank you for hearing this people and try to make there work a safe environment given the circumstances.
