Thank you for your comments and general support for removing the standard metrics and providing narrative options to MTW PHAs. We will continue to work with the MTW Collaborative in determining alternative outcome measures that can be meaningful while minimizing burden. Please see the response below to a specific comment, and please look out for the 30 day PRA Notice in the coming weeks which will have some additional updates, some based on public comments we received:

Comment: The notice underestimated the burden per year per respondent, given the number of implemented activities in SDHC's MTW Plan. The number of hours to prepare the "Ongoing MTW Activities" will likely exceed 10 hours even with the removal of the standard metrics, given the number of implemented activities in SDHC's MTW Plan. The number of hours also does not include the time it takes to complete the required public comment process for the MTW Plan.

Response: "Thank you for the comment. HUD believes if a PHA is completing purely the required information on the Form that on average 66 hours is adequate. While past significant revisions to the Form have created additional work for PHAs as they have transitioned to revised format, these 2024 revisions to the Form are not significant and should still result in a lower overall burden. HUD does understand that many MTW Agencies use the Annual MTW Plan and Annual MTW Report as more than a reporting tool to HUD. In many communities, these documents provide broader and more detailed information than is required in the Form, in order to communicate with local stakeholders regarding the overall programs and operations of the PHA. However, this is not required and is done at the discretion of each PHA"
