As of August 4, the IC instruments for this ICR have not been uploaded, which of course makes it impossible to comment intelligently on the proposed data collection. Therefore, I request that once NIST submits the proposed IC instruments to OMB, the submission date on reginfo.gov be revised accordingly and the 30-day comment period begin as of then. I am perplexed as to why NIST would submit its ICR to OMB without the IC instrument. In 20 years of tracking ICRs, I don't remember ever seeing this before.
