Comment

cormorants shoudl be protected and no federal agency shoudl be in the job of killing them. this agency uses outdated 5 year information from 2017 and 2020 almost 5 years ago to justify this killing when such statistics are fraudulent, unfair, fake and unreliable. i do not believe it is usfws responsibility to worry about whether a cormorant tries to get a fish from an aquaculture profiteer. that is not part of what taxpayers shoudl be paying for this fat cat bureaucracy to get involved in. the aquaculture industry can make buildings are protect their fish. we dont n eed this agency to be on a killing spree of cormorants.usa citizenry does not need a coordinated program to kill across 4 flyways. that is more fat cat bureaucracy. that makes no sense at all. the 4 flyways are all different climactiallhy and geographically.this entire program of cormorant killing shoudl be cancelled and shut down at this time. no taxpayer dollars should be used to fund this killing.usfws is on a power trip of killing instead of beneficialy environment and wildlife protection. so sad and so sick and insane. taxpayers are being bankruptped to pay for this stupidity at usfws.
