I am writing in support of the recommendations of the working group under the direction of Bob Etheridge regarding the USDA-NASS Farm Labor Survey. I am an H2A user and the rates have increased exponentially over the past 2 years of joining the program and are making it unsustainable to continue to the program if the increases continue year over year. I've attached a letter documenting their recommendations and I am in full support of these in order to freeze the rate to allow time to create a new survey that brings more accurate information to the wages we encounter. Thank you for your time.

Dana
