

Introductory Pain Course Survey

We are developing an introductory pain course and would like input from potential learners and other stakeholders. The target audience for the course is early-stage pain researchers and researchers who are interested in learning more about pain (e.g., post-baccalaureate and pre-doctoral researchers).

Please take a few minutes to provide your feedback. Your input is appreciated.

OMB#0925-0648

Expiration Date: 07/2027

Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0648). Do not return the completed form to this address.

All questions are optional, and you may exit the survey anytime.

Introductory Pain Course Survey

1. What general topics do you suggest including in an introductory pain course?

2. Are there any specific pain conditions (painful conditions or insensitivities to pain) you would like to include in an introductory pain course?

3. Are there any organ systems, molecular pathways, or cellular systems that you would like to see discussed in the context of nociception pain or pain management?
