PART I.—GENERAL INFORMATION

Background.-- These proceedings were instituted in response to a petition filed on January 25, 2024, by the American Paper Plate Coalition, which is comprised of AJM Packaging Corporation, Bloomfield Hills, Michigan, Aspen Products, Inc., Kansas City, Missouri, Dart Container Corporation, Mason, Michigan, Hoffmaster Group, Inc., Oshkosh, Wisconsin, Huhtamaki Americas, Inc., De Soto, Kansas, and the Unique Industries, Inc., Philadelphia, Pennsylvania. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Pertinent information to these proceedings are available at:

Questionnaires: https://usitc.gov/reports/active_import_injury_questionnaires

Other case information: <https://ids.usitc.gov/case/8170/investigation/8539>

Paper plates covered by these proceedings are certain paper plates. Paper plates subject to this investigation may be cut from rolls, sheets, or other pieces of paper and/or paper board. Paper plates subject to this investigation have a depth up to and including two (2.0) inches, as measured vertically from the base to the top of the lip, or the edge if the plate has no lip. Paper plates subject to this investigation may be uncolored, white, colored, or printed. Printed paper plates subject to this investigation may have any type of surface finish, and may be printed by any means with images, text and/or colors on one or both surfaces. Colored paper plates subject to this investigation may be colored by any method, including but not limited to printing, beater-dyeing, and dip-dyeing. Paper plates subject to this investigation may be produced from paper of any type (including, but not limited to, bamboo, straws, bagasse, hemp, kenaf, jute, sisal, abaca, cotton inters and reeds, or from non-plant sources, such as synthetic resin (petroleum)-based resins), may have any caliper or basis weight, may have any shape or size, may have one or more than one section, may be embossed, may have foil or other substances adhered to their surface, and/or may be uncoated or coated with any type of coating.

The paper plates subject to this investigation remain covered by the scope of this investigation whether imported alone, or in any combination of subject and non-subject merchandise. When paper plates subject to this investigation are imported in combination with non-subject merchandise, only the paper plates subject to this investigation are subject merchandise.

The paper plates subject to this investigation include paper plates matching the above description that have been finished, packaged, or otherwise processed in a third country by performing finishing, packaging, or processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the paper plates. Examples of finishing, packaging, or other processing in a third country that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the paper plates include, but are not limited to, printing, application of other surface treatments such as coatings, repackaging, embossing, and application of foil surface treatments.

Excluded from the scope of this investigation are paper plates molded or pressed directly from paper pulp (including but not limited to unfelted pulp), which are currently classifiable under subheading 4823.70.0020 of the Harmonized Tariff Schedule of the United States (HTSUS).

Also excluded from the scope of this investigation are articles that otherwise would be covered but which exhibit the following two physical characteristics: (a) depth (measured vertically from the base to the top of the lip, or edge if no lip) equal to or greater than 1.25 inches but less than two (2.0) inches, and (b) a base not exceeding five (5.0) inches in diameter if round, or not exceeding 20 square inches in area if any other shape.

Also excluded from the scope of this investigation are paper bowls, paper buckets, and paper food containers with closeable lids.

Paper plates are currently imported under statistical reporting number 4823.69.0040 of the Harmonized Tariff Schedule of the United States (HTSUS). Paper plates subject to this investigation also may be imported under HTSUS statistical reporting number 4823.61.0040. If packaged with other articles, the paper plates subject to this investigation also may be imported under HTSUS statistical reporting numbers 9505.90.4000 and 9505.90.6000. The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

Importer.--Any person or firm engaged, either directly or through a parent company or subsidiary, in importing paper plates (as defined above) into the United States from a foreign manufacturer or through its selling agent.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, and/or purchaser questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (see 19 U.S.C. § 1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

Valid number error messages.--If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue is provided at the end of this questionnaire and is available upon request from Stamen Borisson (202-205-3125, stamen.borisson@usitc.gov).

D-GRIDS tool.--The Commission has a tool that firms can use to move data from their own MS Excel compilation files into self-contained data tables within this MS Word questionnaire, thereby reducing the amount of cell-by-cell data entry that would be required to complete this form. This tool is a macro-enabled MS Excel file available for download from the Commission's generic questionnaires webpage (https://www.usitc.gov/trade_remedy/question.htm) called the "D-GRIDs tool." Use of this tool to help your firm complete this questionnaire is optional. Firms opting to use the D-GRIDs tool to populate their data into this questionnaire will need the D-GRIDs specification sheet PDF file specific to this proceeding (available on the case page which is linked under the "Background" above) which includes the necessary references relating to this questionnaire, as well as the macro-enable MS Excel D-GRIDs tool itself from the generic questionnaires page. More detailed instructions on how to use the D-GRIDs tool are available within the D-GRIDs tool itself.

III-3e. Additional costs for your firm's imports of paper plates for your firm's retail sale.—

- i. Did your firm incur any additional costs by importing paper plates rather than purchasing from a U.S. producer or importer (e.g., logistical or supply chain management costs, warehousing/inventory carrying costs, insurance or other risk management fees, demurrage fees, indirect and overseas costs)?
- ☐ No ☐ Yes—Please answer parts ii, iii, and iv.
- ii. Please provide an estimate of the total additional cost incurred (as a percentage compared to LDP value) when importing paper plates rather than purchasing from a U.S. producer or importer. Correcting valid number error messages.--If you are completing this questionnaire in a country that uses periods (".") to delineate multiples of 1000 (i.e., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in the numeric form fields. This issue stems from your computer's number formatting setting (i.e., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (",") delineate multiples of 1000 and periods (".") delineate fractions less than one. Many EU and other countries use the reverse where multiples of 1000 are delineated with periods (".") and fractions less than one are delineated with commas (","). The U.S. International Trade Commission's questionnaires are set-up in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU or other country number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g., "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC importer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to Italy (or your country) settings.
