General Comment

there are far far more poisonings of american citizens so that they die or almost die in this country because of the lax administration and work of this agency. i do not think the american people get the attention to detail that we deserve for the huge sums of money we are paying for personnel who work at this agency. we are getting substandard work effort. we need managerial effort to see that work is produced in this lax negligent agency that works far in cahoots with the food producers to allow the production of poison food. your agency is not helping the average american imo. its substandard work. i would grade this agency as work worth an f minus or zero.
