[Comments re Form EIA-112.pdf](#)

Dear Mr. Harnish,

Please see the attached comments from the Indiana Municipal Power Agency regarding the EIA's proposed Form 112.

Best wishes,
Peter

Peter J. Prettyman

Peter,

Thank you for submitting a comment on the *Residential Utility Disconnections Survey*.

Congress tasked the U.S. Energy Information Administration with determining if collecting disconnection data from natural gas and electric utilities is feasible. We will invite utilities of various ownership types (investor-owned, municipal, cooperative, etc.) to complete the survey. We performed extensive pretesting to see which data we could reasonably collect and in at what level of detail. We concluded that most utilities can provide this data without extensive effort. We understand that some utilities will face some issues providing this data in the first year, which is why we will not include the smallest utilities in the survey. We also minimized the number of questions and the frequency of the survey to help reduce the impact on utilities.

Assuming the Office of Management and Budget (OMB) approves the survey, we will start collecting the disconnection data for 2024 in early 2025. We plan to publish data at the utility level and aggregate it to the state, census division, and national levels.

Marc Harnish
