

FOREIGN PRODUCERS'/EXPORTERS' QUESTIONNAIRE

OVERHEAD DOOR COUNTERBALANCE TORSION SPRINGS FROM CHINA AND INDIA

This questionnaire must be received by the Commission by **November 12, 2024**
See last page for instructions regarding how to file this questionnaire.

The information called for in this questionnaire is for use by the United States International Trade Commission in connection with its countervailing duty and antidumping investigations concerning overhead door counterbalance torsion springs ("overhead door springs") from China and India (Inv. Nos. 701-TA-746-747 and 731-TA-1724-1725 (Preliminary)). The information requested in the questionnaire is requested under the authority of the Tariff Act of 1930, title VII.

Name of firm _____

Address _____

Website _____

Has your firm produced or exported overhead door springs (as defined on next page) at any time since January 1, 2021?

☐ **NO** (Sign the certification below and promptly return **only** this page of the questionnaire to the Commission)

☐ **YES** (Complete all parts of the questionnaire, and return the entire questionnaire to the Commission)

Data reported in this questionnaire relate to (Check one):

☐ China

☐ India

Return questionnaire via the Commission's secure portal by clicking on the following link:
<https://usitc.gov/qportal>. (PIN: **DOOR**; Phase: **Preliminary**). See last page for detailed instructions.

CERTIFICATION

I certify that the information herein supplied in response to this questionnaire is complete and correct to the best of my knowledge and belief and understand that the information submitted is subject to audit and verification by the Commission. By means of this certification I also grant consent for the Commission, and its employees and contract personnel, to use the information provided in this questionnaire and throughout this proceeding in any other import-injury proceedings conducted by the Commission on the same or similar merchandise.

I, the undersigned, acknowledge that information submitted in response to this request for information and throughout this proceeding or other proceedings may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. I understand that all contract personnel will sign appropriate nondisclosure agreements.

PART I.—GENERAL INFORMATION

Background.--This proceeding was instituted in response to a petition filed on October 29, 2024, by IDC Group, Inc., Minneapolis, Minnesota; Iowa Spring Manufacturing, Inc., Adel, Iowa; and Service Spring Corp., Maumee, Ohio. Countervailing and/or antidumping duties may be assessed on the subject imports as a result of these proceedings if the Commission makes an affirmative determination of injury, threat, or material retardation, and if the U.S. Department of Commerce ("Commerce") makes an affirmative determination of subsidization and/or dumping. Pertinent information to this proceeding is available at:

Questionnaires: https://usitc.gov/reports/active_import_injury_questionnaires.

Other case information: <https://ids.usitc.gov/case/8234/investigation/8655>

Overhead door springs covered by this proceeding are helically wound, overhead door counterbalance torsion steel springs ("overhead door counterbalance torsion springs"). Overhead door counterbalance torsion springs are helical steel springs with tightly wound coils that store and release mechanical energy by winding and unwinding along the spring's axis by an angle, using torque to create a lifting force in the counterbalance assembly typically used to raise and lower overhead doors, including garage doors, industrial rolling doors, warehouse doors, trailer doors, and other overhead doors, gates, grates, or similar devices. The merchandise covered by these investigations covers all overhead door counterbalance torsion springs with a coil inside diameter of 15.8 millimeters ("mm") or more but not exceeding 304.8 mm (measured across the diameter from inner edge to inner edge); a wire diameter of 2.5 mm to 20.4 mm; a length of 127 mm or more; and regardless of the following characteristics:

- Wire type (including, but not limited to, oil-tempered wire, hard-drawn wire, music wire, galvanized or other coated wire);
- Wire cross-sectional shape (*e.g.*, round, square, or other shapes);
- Coating (*e.g.*, uncoated, oil- or water-based coatings, lubricant coatings, zinc, aluminum, zinc-aluminum, paint or plastic coating, etc.);
- Winding orientation (left-hand or right-hand wind direction);
- End type (including, but not limited to, looped, double looped, clipped, long length, mini warehouse, Barcol, Crawford, Kinnear, Wagner, rolling steel or barrel ends); and
- Whether the overhead door counterbalance torsion springs are fitted with hardware, including but not limited to fasteners, clips, and cones (winding or stationary cones).

For purposes of the diameters referenced above, where the nominal and actual measurements vary, a product is within the scope if application of either the nominal or actual measurement would place it within the scope based on the definitions set forth above.

The steel torsion springs included in the scope of these investigations are produced from steel in which: (1) iron predominates, by weight, over each of the other contained elements; and (2) the carbon content is 2 percent or less, by weight.

Subject merchandise includes cones or other fittings attached to or entered with the subject overhead door counterbalance torsion springs. Subject merchandise also includes all subject overhead door counterbalance torsion springs entered as a part of overhead door kits, overhead door mounting or assembly kits, or as a part of a spring-operated motor assembly or as a part of a spring winder assembly kit for torsion springs. When counterbalance torsion springs are entered as a part of such kits, only the counterbalance spring and cones attached to or entered with the spring are within scope.

Subject merchandise also includes overhead door counterbalance torsion springs that have been further processed in a third country, including but not limited to cutting to length, attachment of hardware, cones or end-fittings, inclusion in garage door kits or garage door mounting or assembly kits, or any other processing that would remove the merchandise from the scope of these orders if performed in the country of manufacture of the in-scope overhead door counterbalance torsion springs.

All products that meet the written physical description are within the scope of these investigations unless specifically excluded. The following products are specifically excluded from the scope of these investigations:

- Leaf springs (slender arc-shaped length of spring steel of a rectangular cross-section);
- Disc springs (conical springs consisting of a convex disc with the outer edge working against the center of the disc);
- Extension springs (close-wound round helical wire springs that store and release energy by resisting the external pulling forces applied to the spring's ends in the direction of its length);
- Compression springs (helical coiled springs with open wound active coils (such open winding is also known as pitch) that are designed to compress under load or force); and
- Spiral springs (torsion springs wound as concentric spirals such as a clock spring or mainspring).

Overhead door springs are currently imported under statistical reporting numbers 7320.20.5020, 7320.20.5045 and 7320.20.5060 of the Harmonized Tariff Schedule of the United States (HTSUS). They may also be classified under HTSUS subheading 8412.90.9085 if entered as parts of spring-operated motors. They may also be classified in HTSUS subheading 8412.80.1000 (spring-operated motors) if entered as part of a spring counterweight assembly for an overhead door. They may also be classified in HTSUS subheading 7308.90.9590, a basket category that includes metal garage doors entered with mounting accessories or assemblies. The HTSUS provisions are for convenience and customs purposes; the written description of the scope is dispositive.

Reporting of information.--If information is not readily available from your records, provide carefully prepared estimates. If your firm is completing more than one questionnaire (i.e., a producer, importer, purchaser and/or foreign producer questionnaire), you need not respond to duplicated questions.

Confidentiality.--The commercial and financial data furnished in response to this questionnaire that reveal the individual operations of your firm will be treated as confidential by the Commission to the extent that such data are not otherwise available to the public and will not be disclosed except as may be required by law (*see* 19 U.S.C. §1677f). Such confidential information will not be published in a manner that will reveal the individual operations of your firm; however, general characterizations of numerical business proprietary information (such as discussion of trends) will be treated as confidential business information only at the request of the submitter for good cause shown.

Verification.--The information submitted in this questionnaire is subject to audit and verification by the Commission. To facilitate possible verification of data, please keep all files, worksheets, and supporting documents used in the preparation of the questionnaire response. Please also retain a copy of the final document that you submit.

Release of information.--The information provided by your firm in response to this questionnaire, as well as any other business proprietary information submitted by your firm to the Commission in connection with this proceeding, may become subject to, and released under, the administrative protective order provisions of the Tariff Act of 1930 (19 U.S.C. § 1677f) and section 207.7 of the Commission's Rules of Practice and Procedure (19 CFR § 207.7). This means that certain lawyers and

other authorized individuals may temporarily be given access to the information for use in connection with this proceeding or other import-injury proceedings conducted by the Commission on the same or similar merchandise; those individuals would be subject to severe penalties if the information were divulged to unauthorized individuals.

Valid number error messages.--If you are completing this form in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 rather than \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete this form. Detailed instructions on how to resolve this issue are provided at the end of this questionnaire and are available upon request from Peter Stebbins (202-205-2039), peter.stebbins@usitc.gov.

- I-1. **Reporting requirements.**--Please report below the actual number of hours required and the cost to your firm of completing this questionnaire for use by the Office of Management and Budget.

Hours	Dollars

Public reporting burden for this questionnaire is estimated to average 30 hours per response, including the time for reviewing instructions, gathering data, and completing and reviewing the questionnaire.

We welcome comments regarding the accuracy of this burden estimate, suggestions for reducing the burden, and any suggestions for improving this questionnaire. Please provide such comments to the Office of Investigations, import_injury@usitc.gov.

- I-2. **Establishments covered.**--Provide the name and address of establishment(s) covered by this questionnaire.

"Establishment"--Each facility of a firm in China or India involved in the production or export of overhead door springs, including auxiliary facilities operated in conjunction with (whether or not physically separate from) such facilities. Firms operating more than one establishment in China or India should combine the data for all establishments into a single report.

--

“Related firm” –A firm that your firm solely or jointly owned, managed, or otherwise controlled; a firm that solely or jointly owned, managed, or otherwise controlled your firm; and/or a firm that was solely or jointly owned, managed, or otherwise controlled by a firm that also solely or jointly owned, managed, or otherwise controlled your firm.

- I-3. **Related producers.**--Does your firm or any related firm produce, have the capability to produce, or have any plans to produce overhead door springs in the United States or other countries?

No	Yes	If yes, please name the firm(s) and country(ies) below and, if U.S. producer(s), ensure that they complete the Commission’s producer questionnaire.
☐	☐	

- I-4. **Related U.S. importers.**--Does your firm or any related firm import or have any plans to import overhead door springs into the United States?

No	Yes	If yes, please name the firm(s) below and ensure that they complete the Commission’s importer questionnaire.
☐	☐	

- I-5. **Stock symbol information.**-- If your firm or any of the entities reported in questions I-2 through I-4 are publicly traded in the United States, please specify the stock exchange and trading symbol (including American Depositary Receipts, if applicable): _____.

- I-6. **External counsel.**-- If your firm or parent firm is represented by external counsel in relation to this proceeding, please specify the name of the law firm and the lead attorney(s).

Law firm:	
Lead attorney(s):	

I-7. **U.S. importers.**--Please provide the names, contacts, telephone numbers, and e-mail addresses of the **TEN** largest U.S. importers of your firm's overhead door springs since January 1, 2021.

Importer's name		Contact person	Email	Telephone	Share of your firm's 2023 U.S. exports (%)

PART II.--TRADE AND RELATED INFORMATION

Further information on this part of the questionnaire can be obtained from Peter Stebbins (202-205-2039, peter.stebbins@usitc.gov). Supply all data requested on a calendar-year basis.

- II-1. **Contact information.**--Please identify the responsible individual and the manner by which Commission staff may contact that individual regarding the confidential information submitted in Part II.

Name	
Title	
Email	
Telephone	

- II-2a. **Changes in operations.**--Please indicate whether your firm has experienced any of the following changes in relation to the production of overhead door springs since January 1, 2021.

Check as many as appropriate.		If checked, please describe the nature, timing / duration, and impact on operations of any such reported changes as well as the business reasons for them; leave completely blank if not applicable
☐	Plant openings	
☐	Plant closings	
☐	Prolonged shutdowns	
☐	Production curtailments	
☐	Relocations	
☐	Expansions	
☐	Acquisitions	
☐	Consolidations	
☐	Weather-related or force majeure events	
☐	Other (e.g., revised labor agreements, technology)	

- II-2b. **COVID-19 pandemic.**—Has the COVID-19 pandemic or have any government actions taken to contain the spread of the COVID-19 virus resulted in changes in your firm's supply chain arrangements, production, and shipments (including exports to the United States) relating to overhead door springs? In your response, please discuss the duration and timing of any such changes as they relate to your firm's operations.

No	Yes	If yes, describe these changes including the impact over time on the (a) supply chain and (b) production and shipments with respect to overhead door springs.
☐	☐	

- II-2c. **Anticipated changes in operations.**—Does your firm anticipate any changes in the character of its operations or organization (as noted above) relating to the production of overhead door springs in the future?

No	Yes	If yes, supply details as to the likely timing, nature, and significance of such anticipated changes and describe the underlying assumptions and business reasons for them.
☐	☐	

- II-3a. **Production using same machinery.**--Please report your firm's production of products using the same equipment, machinery, or employees as used to produce overhead door springs, and the combined capacity (both installed and practical capacity) on this shared equipment, machinery, or employees in the periods indicated.

"Installed overall capacity" – The level of production that your establishment(s) could have attained, assuming your firm's *optimal* product mix, and based solely on *existing capital investments*, i.e., machinery and equipment that is in place and ready to operate. This capacity measure does not take into account other constraints to production such as existing workforce constraints, availability of raw materials, or downtime for maintenance, repair, and clean-up. This capacity measure is sometimes referred to as "nameplate" or "theoretical" capacity.

"Practical overall capacity" – The level of production that your establishment(s) could reasonably have expected to attain, taking into account your firm's *actual* product mix over the period. This capacity measure is based on not only existing capital investments, i.e., machinery and equipment that is in place and ready to operate; but also non-capital investment constraints, such as (1) normal operating conditions, including normal downtime for maintenance, repair, and cleanup; (2) your firm's existing in place and readily available labor force; (3) availability of material inputs; and (4) any other constraints that may have limited your firm's ability to produce the reported products. Importantly, this capacity measure is the maximum "practical" production your firm could have achieved without hiring new personnel or expanding the number of shifts operated in the period.

"Practical overhead door springs capacity" – The level of production of overhead door springs that your establishment(s) could reasonably have expected to attain. The same assumptions apply to this capacity measure as for practical overall capacity, but only includes the portion of practical overall capacity allocated to the production of overhead door springs based on the actual product mix experienced over the period.

"Production" – All production in your establishment(s) in China or India, including production consumed internally within your firm and production for another firm under a toll agreement.

Takes into account	Installed overall capacity	Practical overall capacity	Practical overhead door springs capacity
Existing capital investments	Yes	Yes	Yes
Product mix	Yes	Yes	Yes
Normal downtime, maintenance, repair and clean-up	No	Yes	Yes
Existing labor force	No	Yes	Yes
Availability of material inputs	No	Yes	Yes
Actual number of shifts and hours operated	No	Yes	Yes
Limited to overhead door springs	No	No	Yes

II-3a. **Production using same machinery.**—*Continued*

Item	Quantity (in pounds)				
	Calendar year			January-June	
	2021	2022	2023	2023	2024
Capacity measures:					
Installed overall capacity ¹					
Practical overall capacity ^{1 2}					
Practical overhead door springs capacity ^{3 4}	0	0	0	0	0
Production of:					
Overhead door springs ^{3 4}	0	0	0	0	0
Out-of-scope products:					
Extension springs					
Other out-of-scope products ⁵					
Subtotal, out-of-scope production	0	0	0	0	0
Total production using same machinery or workers	0	0	0	0	0
¹ Data reported for both "installed overall" and "practical overall" capacity should each individually be greater than data reported for total production (last line). Additionally, data reported for "installed overall" capacity should be greater than "practical overall" capacity in every period. ² Please provide details in your response to the question on capacity constraints in question II-3d below that explain the differences reported between "installed" and "practical" overall production capacities. ³ Data entered in question II-9 for this indicator will populate here. ⁴ Data reported for practical overhead door springs capacity should be greater than the data reported for production of overhead door springs in each period, if not revise prior to submission to the Commission. Additionally, if your firm reports the production of no other products on the same machinery and using the same workers as overhead door springs then "practical overall" and "practical overhead door springs " capacity measures should be equal to each other. ⁵ Please identify these products: _____.					

II-3b. **Operating parameters.**—The *practical* overall capacity reported in II-3a is based on the following operating parameters:

Hours per week	Weeks per year

- II-3c. **Capacity calculations.**--Please describe the methodology used to calculate *installed* and *practical* overall capacities reported in II-3a, and explain any changes in reported capacities.

--

- II-3d. **Practical overall capacity constraints.**--Please describe the constraint(s) that set the limit(s) on your firm's practical overall capacity over the period reported in question II-3a. If different constraints were binding over different periods reported, please specify when each constraint was limiting your reported practical overall capacity. If a constraint was not actually binding over the period reported, but was still a constraint to achieving the installed capacity level, indicate at what level it would have been binding.

Constraint (check as many as appropriate)		Description (If checked, please describe the details, timing, and duration of the constraint; leave completely blank if not applicable)
☐	Production bottlenecks	
☐	Existing labor force	
☐	Supply of material inputs	
☐	Fuel or energy	
☐	Storage capacity	
☐	Logistics/transportation	
☐	Other constraints (list the specific constraints in the description field)	

- II-3e. **Reaching installed overall capacity.**--Please describe and quantify the amount of time it would take and the additional actions that would be needed (e.g., hiring new workers, expanding shifts, procuring larger sources of raw material supply, etc.) for your firm to be able to fully utilize the reported installed overall capacity reported in II-3a.

--

- II-3f. **Excess installed overall capacity:** To the extent that your company is reporting excess installed overall capacity, please report, with specificity: (1) which machines or equipment (or other elements of production) would need to be brought back into production for your plant to operate at full capacity, and (2) the specific dates on which such machines or equipment were last used by your plant to produce overhead door springs.

--

- II-4. **Product shifting.**—

- (a) Is your firm able to switch production (capacity) between overhead door springs and other products using the same equipment and/or labor?

No	Yes	If yes—(i.e., have produced other products or are able to produce other products) Please identify other actual or potential products.
☐	☐	

- (b) Please describe the factors that affect your firm's ability to shift capacity between products (e.g., time, cost, relative price change, etc.), and the degree to which these factors enhance or constrain such shifts.

--

- II-5. **Capacity checklist.**--Please check that the capacity numbers reported in question II-3a follow the Commission's relevant definitions for capacity.

Item	√ if Yes
Are all three capacity measures reported based on <u>currently installed machinery and equipment</u> (i.e., the reported capacity level would not require additional capital investments in order to achieve)?	☐
Are practical overall capacity and practical overhead door springs capacity measures reported based on <u>existing labor force</u> (i.e., the reported capacity level would not require hiring additional production related workers or adding shifts)?	☐
Are practical overall capacity and practical overhead door springs capacity measures based on <u>the actual availability of material inputs</u> ?	☐
Do both practical overall capacity and practical overhead door springs capacity measures account for <u>normal downtime, maintenance, repair and clean-up</u> activities?	☐
Does the difference between practical overall capacity and practical overhead door springs capacity equal the portion of practical overall capacity that is dedicated to the production of out-of-scope products?	☐

Note: If your firm is not able to answer "yes" to any of the above criteria as it relates to your firm's reported capacity levels, please revise your capacity numbers to be in conformance with the appropriate definition prior to submission to the Commission.

- II-6. **Share of sales.**--What percentage of your firm's total sales in its most recent fiscal year was represented by sales of overhead door springs? ____ percent.
- II-7a. **Firm's estimated share of production.**--Please estimate the percentage of total production of overhead door springs in the country specified on the certification page accounted for by your firm's production in 2023. ____ percent.
- II-7b. **Firm's estimated share of exports.**--Please estimate the percentage of total exports to the United States of overhead door springs from the country specified on the certification page accounted for by your firm's exports in 2023. ____ percent.
- II-8. **Third country trade actions.**--Are the overhead door springs exported by your firm subject to antidumping/countervailing duty/safeguard findings, remedies, or proceedings?

No	Yes	If yes--List the products(s), countries affected, and the date of such findings/remedies/proceedings.
☐	☐	

- II-9. **Trade data**--Report your firm's capacity, production, shipments, and inventories related to the production of overhead door springs in your establishment(s) in China or India during the specified periods. Do not include resales of overhead door springs that your firm did not produce in this question; those data to the degree they are exported to the United States should only be reported in question II-10.

Do not submit data by manufacturing facility if they are in the same country. If your firm has multiple manufacturing establishments within one country, you are required to combine data for those establishments within one foreign producer questionnaire response.

Do not submit data on multiple countries combined. The establishments reported here should all be located in the country of the firm's address reported on the certification page. Multinational companies with production in multiple subject countries should submit separate foreign producer questionnaire responses for each subject country.

"Shipments"--Shipments of products produced in your establishment(s) in China or India. Quantities reported should be net of returns.

"Home market commercial shipments"--Shipments, other than internal consumption and transfers to related firms, within China or India.

"Home market internal consumption/transfers to related firms"--Shipments made to related firms in China or India, including product consumed internally by your firm.

"Export shipments"--Shipments to destinations outside of the country indicated on page 1 (China or India), including shipments to related firms.

"Inventories"--Finished goods inventory, not raw materials or work-in-progress.

Note: As requested in Part I of this questionnaire, please keep all supporting documents/records used in the preparation of the trade data, as Commission staff may contact your firm regarding questions on the trade data. The Commission may also request that your company submit copies of the supporting documents/records (such as production and sales schedules, inventory records, etc.) used to compile these data.

Item	Actual experience					Projections	
	Calendar year			January-June		Calendar year	
	2021	2022	2023	2023	2024	2024	2025
B + C – D – E – F – G – J = should equal zero ("0") or provide an explanation. ¹	0	0	0	0	0	0	0
¹ Explanation if the calculated fields above are returning values other than zero (i.e., "0") but are nonetheless accurate:							

- II-10. **Exports to the United States not produced by your firm.**--Report your firm's exports to the United States of overhead door springs that was produced in China or India but not by your firm during the specified periods. Note these data should **not** be included in question II-9.

Quantity (in pounds)							
Item	Actual experience					Projections	
	Calendar year			January-June		Calendar year	
	2021	2022	2023	2023	2024	2024	2025
Exports of overhead door springs to the United States not produced by your firm ¹							
¹ List the producer(s). _____.							

- II-11. **Other explanations.**--If your firm would like to further explain a response to a question in Part II for which a narrative box was not provided, please note the question number and the explanation in the space provided below. Please also use this space to highlight any issues your firm had in providing the data in this section, including but not limited to technical issues with the MS Word questionnaire.

Correcting valid number error messages.--If you are completing this questionnaire in a country that uses periods (".") to delineate multiples of 1000 (e.g., one million would appear as \$1.000.000 instead of as \$1,000,000), you may be unable to enter in numbers greater than 999 in numeric form fields. This issues stem from your computer number formatting setting (e.g., not the MS Word document itself, but the computer from which you are opening up the document). In the United States commas (,) delineate multiples of 1000 and periods (.) delineate fractions less than one. Many EU countries use the reverse where multiples of 1000 are delineated with periods (.) and fractions less than one are delineated with commas (,). This questionnaire is prepared in the United States with the U.S. number formatting. When this formatting interacts with a computer set to EU number formatting, we believe this may cause this issue.

The solution to this data entry issue is to temporarily change your operating system's number formatting to be consistent with the U.S. number formatting system while you complete the questionnaire.

To temporarily change your computer's number settings to U.S. settings, please do the following (for Microsoft Windows Operating system):

- START
- Control Panel
- Region and Language (under Clock, Language, and Region category)
- Format tab
- Change the Format from your existing one (e.g., "Italian (Italy)") to "English (United States)" (see screen shots below)

When you do this the number "twelve million dollars and thirty five cents" would change from \$12.000.000,35 (Italy format) to \$12,000,000.35 (U.S. format), and then there will be no conflict with the USITC foreign producer questionnaire form. When you finish reporting the data then you can close the questionnaire and switch back to your country settings.

HOW TO FILE YOUR QUESTIONNAIRE RESPONSE

This questionnaire is available as a “fillable” form in MS Word format on the Commission’s website at:

https://usitc.gov/reports/active_import_injury_questionnaires.

Please do not attempt to modify the format or permissions of the questionnaire document. Please submit the completed questionnaire using one of the methods noted below. If your firm is unable to complete the MS Word questionnaire or cannot use one of the electronic methods of submission, please contact the Commission for further instructions.

• **Upload via Commission’s secure submission portal.**— The questionnaire must be uploaded in two formats: (1) a Microsoft Word 97-2003 document; and (2) a PDF copy of the complete questionnaire with a signature on the first page. Please include any attachments at the end of the PDF (e.g., APO certification, additional comments, etc.).

Web address: <https://usitc.gov/qportal> **Pin:** **DOOR** **Phase:** **Preliminary**

• **E-mail.**— *E-mail the MS Word questionnaire to peter.stebbins@usitc.gov; include a PDF copy of the complete questionnaire with a signature on the first page. Submitters are strongly encouraged to encrypt nonpublic documents that are electronically transmitted to the Commission to protect your sensitive information from unauthorized disclosure. The USITC secure submission portal and the Electronic Document Information System (EDIS) use Federal Information Processing Standards (FIPS) 140-2 cryptographic algorithms to encrypt data in transit. Submitting your nonpublic documents by a means that does not use these encryption algorithms (such as by email) may subject your firm’s nonpublic information to unauthorized disclosure during transmission. If you choose a non-encrypted method of electronic transmission, the Commission warns you that the risk of such possible unauthorized disclosure is assumed by you and not by the Commission.*

If your firm did not produce or export this product, please fill out page 1, print, sign, and submit a scanned PDF copy via the Commission’s secure submission portal or email.

Parties to this proceeding.— If your firm is a party to this proceeding, it is required to serve a copy of the completed questionnaire on parties to the proceeding that are subject to administrative protective order (see 19 CFR § 207.7). A list of such parties may be obtained from the Commission’s Secretary (202-205-1802). A certificate of service must accompany the completed questionnaire you submit (see 19 CFR § 207.7). Service of the questionnaire must be made in paper form.
