Please accept the uploaded letter as comment on the proposed changes to the Community Services Block Grant (CSBG) Annual Report. These comments are made from the perspective of a small agency that often struggles with the current strict definitions of outcome documentation, but does not agree that outcomes should be abandoned altogether. Our agency believes that the proposed changes should not be implemented without robust, thorough and meaningful engagement of the CSBG network of national, state and local agencies and stakeholders to determine the actual burdens facing reporting entities and the hardships changes will impose.
