Please stop restricting help for cancer and chronic pain patients! Enough is enough already. To have a debilitating spine disease AND breast cancer with Tylenol is insane! It's a sin to make us suffer because you think we legitimate patients are drug seekers! Punished for having diseases that make us need meds. You do realize that is chemo patients that are bed ridden aren't out on the streets right? You have a double mastectomy and be told to take two Tylenol every 4 hours! Try it! I bet you'd say no! So why the hell should we? Make it right please! Drs treat us and you forbid it. Are you my Dr? Then stay the heck out of my life! Look at these pictures and then go take two Tylenol! Wendy
