The CDC and DEA are overstepping their bounds and creating a crisis, by constantly lowering the non scientific method of MME, and lowering the amount of opioids manufactured every year. People with painful medical conditions are suffering thru State Sponsored Torture, especially our Vets who gave limbs and more to protect our Rights and Freedoms, suicides are at an all time high, yet no one cares and the CDC marks these suicides as overdoses. A few years ago, the CDC admitted that the 2016 Guidelines were based on bias research. Its true, research paid for my Indivior makers of Suboxone. Why the push to get people who were stable on opioids that are proven and cheap, to either no care or a highly expensive medication? Seems like Imdivior paid into the CDC.org account to get these guidelines pushed, and of course out Federal politicians and bureaucrats don't care about the 100 million suffering, and committing suicide, because that's less money that needs to be paid out in disability, that a majority of us worked and paid into for most of our lives. There is plenty of research that less than 1% of people prescribed opiates go on to abuse, yet we are all being tortured by unelected bureaucrats. Its inhumane to run research trials by withholding opiates from a group of people. So why is it ok for our Govt to torture us?
