The CDC and the FBI president in any other law-enforcement needs to stay out of healthcare no one should have to suffer for anything pain medicine was made to help with pain. You do not stop an alcoholic from getting alcohol at the liquor store but yet chronic pain patients and cancer patients can't get FDA approved pain medicine to help When we are struggling and hurting. It is become so crazy to think we can't get our pain treated people are having major surgeries with no pain medication cancer patients can't get. Pain medicine and they've been diagnosed terminal more people die from alcohol than pain medication and yet the government allows liquor stores to stay open but yet my Doctor Who goes to school for 12+ years to be able to prescribe me pain medication when I am hurting is not allowed to because the CDC States oh that patient might get Addicted to alcohol and that's OK because y'all make a profit off of that but since it's pain medication, oh we don't want everybody getting addicted that is just absurd. I should be able to have my pain treated when I need it. We pay taxes just like everybody else taxes are voluntary what if I just stop paying my taxes because I don't feel like the government needs my money if everybody thought like that, the government would be in trouble But being a great citizen in this country gets us nowhere stay out of healthcare CDC
