The CDC created the 2016 Guideline, and then the 2022 updated version of the same guideline. Neither guideline recommendations by the CDC, have done anything that is medically beneficial to CPP. Although, the FDA approved some opioid medications for use by doctors, the CDC has basically banned doctors from prescribing opioids for their patients. In my opinion, 95% or more of the CDC Guideline, is harmful to chronic pain patients and has caused nothing but pain and suffering. The CDC Guideline, needs to be completely j be
