I have a severe nerve condition called Trigeminal Neuralgia, also known as suicidal disease. I am in chronic pain EVERY.DAY. Yes I take gabapentin three times a day, but I also need opioids to help battle this horrific pain. Not to get me high, to get me to function and be a mom, a wife, a housemaker, a daughter. To be able to provide for my family. To be able to live a normal life. Taking these medications away from people who need it are cruel. Every month, I hold my breath, praying my pharmacy has them in stock. Please reconsider and dont cut them, but make more of them for the people who actually need them. I am not getting high off of them, I am surviving on them.
