The CDC Guidelines have destroyed the lives of disabled people with chronic pain who need these drugs to function and have a quality of life. Doctors refuse to prescribe opioids as needed and disabled patients must suffer, die or travel hours to get a pain specialist to prescribe! Some patients have been forced to the streets for relief and overdosed, died by suicide or complications from untreated severe pain. This insanity must stop!! ILLICIT FENTYNL IS THE CAUSE OF THE DRUG PROBLEM IN AMERICA SO STOP BLAMING DISABKED PEOPLE!! FIX WHAT YOU HAVE BROKEN PLEASE!!
