The current DEA and CDC policies have mislabeled opioid dependant patients as addicts due to specific private organizations personal view points that are NOT congruent with actual medical care parameters.

This has caused the harm and death to millions of Americans. ADDITIONALLY NONE of these policies tracked patient outcome... and that missing data would PROVE that legal, fully law abiding people who need treatment for pain are being forced off their medication because these agencies blended the group of ADDICTS into the small group of chronic pain patients.

I request that for the immediate benefit that is actually life and death for many patients with Comorbidities- that the 2016 policies be repealed with instructions to disregard the 2016 mandates immediately.
To grant the medical providers legal safety to use their professional judgement to apply medication as they prescribe to include full agonist opioids without any legal prejudice.

The DEA and CDC have overstepped the Constitutional rights of our Nation.
Please remedy .

If you fail to assist patients you are responsible for their deaths.

The current intentional prohibition on opioids have NOT address the illicit "street" drug issue in fact the data supports that the rise in overdose and death are due to the illegal addicts usage and NOT the legal medical provider or their patients.

Reverse these harmful and shameful policies NOW and allow physicians to treat their patients without threat of retribution from an overly and erroneously persecutory DEA and CDC.

Our country needs access to safe, regulated domestically produced opioid supply.

Do no harm is the 1st mandate in medicine.

The bureaucratic policies of the DEA and CDC have usurped the Hippocratic Oath and are causing direct harm to millions of tax paying , law abiding citizens.

Bureaucrats need to remove themselves from the practice and scope of practicing medicine unless they wish to be licensed and audited in the same manner as the medical providers.

Grant Emergency Remedy to the Chronic Pain and Medical Communities Now!

Thank you.
