Doc# 202412-0920-006

Please stop making people that live in chronic pain continue to suffer in untreated or under treated pain. So many of us can't find a Doctor willing to help us because they fear being sent to prison for having empathy and treating chronic pain. When did it become OK to make people suffer? Us pain patients know it's about profit over patients. Everybody is getting big money to install junk spinal cord stimulator's and spine injections that are not even approved by the FDA. We should not be forced into getting stimulator that do more harm than good there are many horror stories on them and injections don't work for most people and if it's not FDA approved why is it allowed? I will tell you it's for PROFIT!!! Us pain patients know more than you think we do. It's not about an opioid crisis all the overdoses are from illicit drugs coming in from other countries and so many people are desperate for pain relief they go to the street because our own Government. Yes I know there are people addicted also but the people that have proof and diagnosis from a Doctor should be able to have pain relief would you want to lay and suffer in pain? It's a shame cancer patients and children and people with incurable diseases have to suffer so you can profit.
