I'm a 68 yr old female former professional athlete. I suffer with CES. Severe stenosis, DDD, DJD, spondylitis, osteoarthritis. I lost my kidney to cancer. I cannot take NSAIDS. I've endured steroid injections, ablations and inhumane treatment by drs. I've had two spine surgeries, bi lateral knee replacement. I'm told by drs opiates will kill me. I'm told I'm a drug addict without any indication or tests or failure of tests as evidence. I suffer daily now even tho I was a successful pain patient when treated with opiates. My quality of life has disappeared and I no longer thrive. I still make myself walk daily and exercise on my bed to keep muscle atrophy down and my cardio health as strong as possible. Stop making chronic pain patients with absolute chronic progressive conditions suffer. It's unethical to have medicine that is proven a God send to so many be taken from us. Give me back my once active life. I have no other health worries.
