The CDC guidelines have made my life unbearable. You have made it impossible to get relief for my fibromyalgia and migraines. Now I can't even get pain medication for kidney stones. I spend at least half my time in bed. My anxiety is thru the roof since my benzodiazepines have been removed. I never had a problem with any of these medications all the years I took them.

The Gabapentin and Lyrica have made me gain ridiculous amounts of weight and raised my blood pressure to the point where it takes 3 medications to keep it at a reasonable amount of.

Please help. You have the power to help and change the lives of so many people.
