Since the 2016 CDC guidelines were made into Law in Michigan it has turned into a terrible mess. I am seeing many people get cut off completely from their opioids or rapidly extremely reduced down to levels that are in fact more dangerous than prescribed medications that are taken exactly as prescribed. These "guidelines" have been taken as a hard stop and a law now of at first 90mme max prescription dose of opioids. Since the 2022 changes to the guidelines, the changed have not been enforced for the better at all honestly. More people are committing suicide Because of under treatment of pain and no medication treatment of pain. I have firsthand seen experienced the pendulum swing the wrong way 190 degrees and this is straight wrong in that we live in the USA, not oppressive Russia or 3rd world countries. I believe the treatment or should I say under treatment is at it's absolute worst now than it's ever been. This includes chronic pain patients, hospice, post surgical and even cancer treatment of pain. This HAS TO STOP. This is 100% forcing tens of thousands of pain patients to the streets to try to get pain relief, which as a result of illicit fentanyl poisoning, is causing mass overdoses. Overdoses have more than doubled in 10 years while prescription opioids have went down 80%, legal opioid prescriptions are at levels last seen in 1994. THIS IS NOT A COINCIDENCE LAWMAKERS, POLITICIANS, PEOPLE OF INFLUENCE. TODAY'S HEALTHY PEOPLE ARE ONE DAY AWAY FROM BEING TOMORROW'S CHRONIC PAIN / chronic sick patients. Please don't just throw this aside, let it sink in and please help your citizens
