Spine surgeon crippled me. Need at least 120mg for severe spinal pain control. I was receiving this amount until 2016. Have now been homebound since 2016!

Can't use arms, unable to hold myself up or walk.

Walk on tippy toes to bathroom. Have very difficult time just trying to prepare and eat food. Have lost 30lbs since surgery. Not by choice!

Not only did my last surgery fail, I have Juvenile Discogenic disease. No endplates on discs! Genetic. Fell apart in neck 1st time in 2001. Double fusion. It fell apart and had to get triple cervical fusion in 2003. Finally sent to pain mgmt in 2004. I'm going on 25 years of severe spinal pain!!!

Please reverse opioid restrictions so the 1 million Americans that are horrible suffering, can get the medicine we need to survive!!!
