We cannot strip away the basic human rights of our most vulnerable citizens. This hateful executive order has greatly impacted thousands of lives, including my own, and does great damage to this country. Please revert the process to things as they were before January 19th regarding self- selecting sex markers and the X marker. It is unlawful what the Department of State and the President are doing. This goes beyond anything that has happened in our lifetime and the American people are scared. Please, do not give in. Fight for ALL the American people. Every last one of us.
