I do not believe this policy is constitutional in its current form. Discrimination on the basis of gender identity *is* sex discrimination. By implementing these policies, you are necessarily violating long-standing laws and norms in regards to equal protection. The constitution demands that you protect trans rights and rescind this policy. Requiring someone have a different gender marker than their obvious presentation, which will mismatch with many state provided documents, will put them in further danger. This is being done to intentionally harm a vulnerable minority group.
