Hello and thank you for your time. I wanted to request that those applying for renewal of their U.S. passport have the option to chose an additional gender option still besides M and F. Besides folks whose gender identity is nonbinary, there are people who are intersex - born with characteristics that are male and female or even neither. Not all fit into either male or female categories and by restricting/removing the X marker, people are unable to mark what is most accurate when it comes to sex on passport forms. Thank you again.
