Hello and thank you for your time. I wanted to request that name changes based on court orders and gender changes are still allowed via the application process and would include an additional gender option still besides M and F. Besides folks whose gender identity is nonbinary, there are people who are intersex - born with characteristics that are male and female or even neither. Not all fit into either male or female categories and by restricting/removing the X marker, people are unable to mark what is most accurate when it comes to sex on passport forms. Please allow folks to also change their sex marker to align with who they are. Thank you again.
