The changes to the passport renewal form are unnecessary as everything was working alright before these changes, do not address any real issues as the gender anyone identifies as has no impact on other people but themselves, is costing the tax payers money to implement and defend these changes that could be used in other causes, the idea of two sexes in humans go against all scientific evidence and instead it's relaying on old and extremely simplistic ideas, and are just causing more confusion and concern for all of the USA citizens renewing their passports, it completely ignores millions of American citizens that have an intersex condition. These changes should be reverted to what they used to be before the executive order.
