The Citizens of the United States deserve documentation that works for them. We must maintain our ability to accommodate intersex, non-binary, and transgender individuals who require updated documentation to safely identify themselves, travel abroad, conduct business, and return home. It is unconstitutional to deny any citizen who, in good standing and faith, applies to correct, change, or replace their passport with information that matches their social, professional, medical, and legal identity. We urge you to preserve dignity and honor for all US citizens and residents, not just those who conform to a simple baseline.
