The change to this rule is nonsensical, unenforcable, and based purely on an ideaology of hate and not biological, medical, and scientific truth. Not only does this rule negatively impact transgender people whose only crime is exercising their inalienable right to life, liberty, and the pursuit of happiness, it can affect nearly anyone who does not visibly meet arbitrary standards of "man" and "woman". It is also impossible to enforce, as I assume passport applicants will not be subject to genital examinations (and they should not be, as this would be an incredibly cruel and perverse violationof human rights and privacy). The only "gender ideaology" being pushed is the notion seen in rules and orders such as these that attempt to draw arbitrary, irrational, and baseless boxes around human gender.
