The idea that biological sex is not only a binary, but one that must be defended(or more accurately enforced) by the US government is laughable. Unfortunately it's not funny, because hundred of thousand(if not millions!) of Americans are going to be persecuted because of the demands of a vocal, bigoted minority. This makes our nation look foolish and backwards. It harms our citizens. Claiming this is somehow about 'defending women' is absolutely unbelievable. You might as well say it's being done to prevent puppies from having to work in fight clubs to pay for their sick mom's medicine. At least that would be creative.
