Please allow trans US citizens simple freedom of movement and let them self-select gender/sex regardless of what's on their birth certificate. It will create more headaches for the TSA, immigration, and customs to screen people whose gender/sex marker has been reverted to their birth sex after they have already physically transitioned. There are thousands upon thousands of trans people who do not look like their birth sex anymore, even on a genital level, and it is ludicrous to expect they be identified by those outdated markers.
